Annex. Reporting instrument and accompanying instructions	81

Explanatory note

Figures in the tables presented below have been reported by participating States on the basis of the standard instrument for international reporting of military expenditures. For analytical purposes, the information on military expenditures received has been computerized, with minor adjustments, to conform to standard statistical practices.

The replies from States are available at the Centre for Disarmament Affairs, United Nations Headquarters.

I. INTRODUCTION

1. On 12 December 1985, the General Assembly adopted resolution 40/91 B, in which, inter alia, it reiterated its recommendation that all Member States should report annually, by 30 April, to the Secretary-General, using the reporting instrument (see annex), their military expenditures for the latest fiscal year for which data are available. By paragraph 8 of that resolution, the Assembly once again stressed the need to increase the number of reporting States with a view to the broadest possible participation from different geographic regions and representing different budgeting systems.

2. Pursuant to the request of the General Assembly, the Secretary-General, in a note verbale dated 25 February 1994, requested all Member States to submit their reports not later than 30 April 1994.

3. In reply to his note verbale, the Secretary-General has, to date, received reports from 21 countries, all of which had used the reporting instrument. These reports are reproduced in section II of the present report. Further replies will be issued as addenda to the present report.

II. REPLIES RECEIVED FROM GOVERNMENTS

ARGENTINA

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 56,357 roubles.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity cost.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: 63,000 man-years.

2. With reference to point (d) of the specific guidelines above, respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: Nil.

3. With reference to points (n) and (o) above, the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in column 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:

Sales from the military sector of:

(a) Land: -

(b) Real estate other than land: 1,261 million roubles.

(c) Equipment: 11,632 million roubles.

(d) Services: 97 million roubles.

(e) Other: 624 million roubles.

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	Answer	
	Available	Not available
Price index of specific relevance to the military sector	-	-
Exports of military equipment	-	-
Such exports divided by:		
(i) Countries	-	-
(ii) Regions	-	-
Imports of military equipment		
Such imports divided by:		
(i) Countries	-	-
(ii) Regions	-	-

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

BULGARIA

Notes

1. The main part of the operative and maintenance expenditures cannot be allocated between our various defence sectors because of the existing structure of the budgetary system.

2. The expenditures of our presence in the United Nations peace-keeping operations are reported as gross expenditures. The United Nations reimburses a certain share of these expenditures according to the agreed principles of reimbursement. However, owing to certain delays in the United Nations reimbursements, it is difficult for Finland to determine the real net expenditures for us.

3. The civil defence expenditures are not included in military expenditures in Finland. Instead, they are allocated to be expenditures of the Ministry of Interior. Municipalities and private sectors are the main source of financing of civil defence.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 80,580 Fmk/year.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity cost.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: 22,889.

2. With reference to point (d) of the specific guidelines above, respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: N.

3. With reference to points (n) and (o) above, the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: 230 million Fmk.

Sales from the military sector of:

(a) Land: N.

(b) Real estate other than land: N.

(c) Equipment: 25.9 million Fmk.

(d) Services: 16.3 million Fmk.

(e) Other

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	Answer	
	Available	Not available
Price index of specific relevance to the military sector		X
Exports of military equipment	X	
Such exports divided by:		
(i) Countries	X	
(ii) Regions		X
Imports of military equipment	X	
Such imports divided by:		
(i) Countries	X	
(ii) Regions		X

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

/...

Notes

The figures provided concern the French military budget for 1994 which are expressed, excepting those for retired forces, in the monetary unit and according to the nomenclature required by the United Nations. These figures call for the following observations:

(a) The category "Strategic forces" includes appropriations for nuclear deterrents;

(b) The budget for the Gendarmerie is included in the column entitled "Paramilitary forces";

(c) The columns under "Military assistance and "Civil defence" have not been filled out, the former because the necessary figures do not appear in non-classified budgetary documents, and the latter because it does not come under the Ministry of Defence;

(d) The data necessary for the replies to Part II of the United Nations questionnaire are of two types:

(i) Questions 1, 2 and 3 deal with average civilian wage rate for the reporting year, military assistance received from abroad, depletion of ammunition and sales of land, other real estate, equipment and services. These data are not available;

(ii) Questions 4 and 5 concern imports and exports of military equipment and possible ways of comparing French military expenditures with those of other countries. This information is classified.

The total does not include 250 million Duetch Marks shown under column 11 (UN Peace Keeping).

.../...

Notes

1.1 Personnel

Excludes service pensions.

1.2.1 Materials for current use

This item contains petrol, oil and lubrication, communal messing and procurement of replacement clothing, medicines and bandages.

1.2.3 Purchased services

This item includes postage, cargo and transport costs, telecommunication charges and general clerical expenses.

Under the Federal Armed Forces accounting system, travel expenses are staff costs and are included in items 1.1.1 to 1.1.3.

Division of these figures into their component parts would require considerable time and resources.

1.2.4 Rent costs

Rent for immovable property are, with the exception of column 14, included in the maintenance and repair cost for immovable property under item 1.2.2.

2.1.2 Missiles

Expenditure on missiles is included under item 2.1.1.

2.1.6 Artillery/2.1.7 Other ordnance

Separate figures for artillery and other ordnance cannot be given. The sum total is contained under item 2.1.6.

4.0.0 Total (1+2+3)

Breakdown of expenditures for United Nations peace-keeping by item is not available.

Appendix to the reporting matrix 1992

1. 1.1.2 Military pensions are included in total under "Support" (6) at the amount of 1,543,087 thousands of guilders, as a "surrogate" of pension fees.

2. 1.2.2 Major overhauls and modifications are included in the appropriate "procurement" items.

3. 1.2.4 Rent costs are not available.

4. Some of the amount for research and development are for technical reasons included in the appropriate "procurement" items.

5. The Netherlands Royal "Marechaussee" (charged with external as well as internal security tasks) is represented under (5) "Other Combat Forces". Additional expenditures concerning the "Marechaussee" forces are included in the figures presented under (2), (3) and (4).

6. Figures concerning "Civil Defence" are included in the Netherlands reply.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 25,400 Netherlands guilder a year.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity cost.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: 38,892.

2. With reference to point (d) of the specific guidelines above, respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: None.

3. With reference to points (n) and (o) above, the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:

Sales from the military sector of:

(a) Land
(b) Real estate other than land
(c) Equipment
(d) Services
(e) Other

) 104,000,000 guilders.

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	Answer	
	Available	Not available
Price index of specific relevance to the military sector	X	
Exports of military equipment		X
Such exports divided by:		
(i) Countries		X
(ii) Regions		X
Imports of military equipment	X	
Such imports divided by:		
(i) Countries	X	
(ii) Regions	X	

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

NEW ZEALAND

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer:

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity cost.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer:

2. With reference to point (d) of the specific guidelines above, respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer:

3. With reference to points (n) and (o) above, the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in column 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:

Sales from the military sector of:

(a) Land: £68.0 million.

(b) Real estate other than land

(c) Equipment: £48.7 million.

(d) Services

(e) Other

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	Answer	
	Available	Not available
Price index of specific relevance to the military sector	X	
Exports of military equipment	X	
Such exports divided by:		
(i) Countries		X
(ii) Regions	X	
Imports of military equipment		
Such imports divided by:		
(i) Countries		X
(ii) Regions	X	

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

INSTRUCTIONS

Part I

General guidelines

1. The reporting instrument is in the form of a matrix whose vertical axis details expenditures by type of resource costs and whose horizontal axis details expenditures by type of force groups. Concerning the resource costs, the matrix has a pyramidal structure in order to permit reporting on different levels of aggregation. The vertical axis consists of three main cost categories, namely (1) operating costs; (2) procurement and construction; (3) research and development. Each of these categories is then disaggregated into different subcategories and most of the subcategories into sub-subcategories. The figure given for each main category should be equal to the sum of its respective subcategories, and the figure given for each subcategory should be equal to the sum of its respective sub-subcategories.

2. It is desirable that data should be reported for all types of force groups and all categories of resource costs at all aggregation levels provided in the matrix. If this is not possible, the available data should be submitted.

3. The figures to be reported should show actual military expenditures of the latest fiscal year for which data are available. The amounts shall be reported in the respondent's national currency and in current prices, that is, in prices prevailing in the reporting year. The unit of measure in which expenditures are reported may be the standard currency unit itself (that is, pound, rial, etc.) or a commonly used multiple number of units. This number, however, should not be larger than one ten thousandth of the total amount of the country's military expenditures. For example, if total military expenditures are 78,453,296 national currency units, the reported amounts may be expressed in units as large as 1/10,000 x 78,453,296 (= 7,845). That is, the reporting unit of measure may be expressed in thousands of currency units.

4. For the sake of uniformity and clarity of presentation, only the following conventional symbols should be used as required:

- = nil

N = negligible or less than half of the unit employed

( ) = provisional

.. = not applicable

... = not available

The use of blanks or symbols other than those listed above should be avoided. If, however, States feel compelled to use blanks or other symbols, they are requested to give clear explanations of their meaning.

5. It is desirable that data should be reported for all types of force groups and all categories of resource costs, at all levels of aggregation provided in the matrix. If it is not possible to present figures representing expenditures for a certain force group due to unavailability of data, it is understood that these expenditures should be included in one or more of the other force groups, or at least in the total. For the same reason, if respondents find it possible to supply data on resource costs only for higher (and not for lower) levels of aggregation, they are requested to present the figures on the level of aggregation they find appropriate.

6. With a view to the further refinement of the reporting instrument, the States are requested to comment upon any technical or other difficulties that they may encounter when filling in the matrix and to recommend such changes of the matrix as they may find advisable. Such comments should be attached to the completed matrix.

Specific guidelines

The following comments and interpretations are related to those items in the matrix that seem to need some special clarifications. The small letters denoting paragraphs correspond to the notes in the matrix. As has already been pointed out in the introduction, respondents are requested to describe the nature of problems of interpretation that may arise when filling in the matrix.

Force groups (column headings)

(a) Strategic forces

Respondents are requested to report their expenditures on strategic nuclear arms by applying the definitions elaborated in the SALT II Treaty. Should these definitions not be applicable, respondents are requested to explain their definitions used. Reported data should include expenditures on all forces or units that are specifically equipped and trained to operate systems for carrying and delivering such arms. Expenditures on other nuclear arms and forces should be reported under the respective branch of the armed forces.

(b) Central support, administration and command (columns 6 and 7)

Columns 6 and 7 should include supporting activities that are common to more than one of the types of forces covered by columns 1 to 5. Column 6 should include all support activities which, in many cases, may be carried out by special common agencies, while expenditures associated with central command and direction of the military forces should be placed in column 7. The latter would include central and regional military staff with authority over more than one type of force, including the Ministry of Defense administrative function.

(c) Paramilitary forces (column 8)

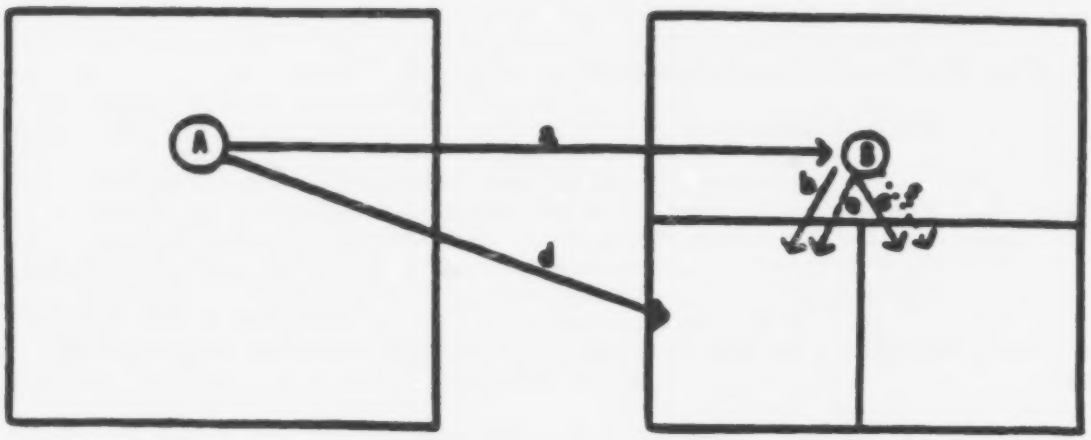
The term paramilitary can apply to a variety of forces. Such forces may be intended to guard the national frontiers, mainly against such activities as illegal migration, smuggling or guerrilla infiltration. In other cases, their chief mission is the maintenance of internal security. Such forces may also be usable against an external armed enemy.

For present purposes, it is necessary to identify those elements that should be included in the military sector and those which should not. It seems reasonable to include in paramilitary forces those units, formations, etc., that are organized, equipped and behave in a similar way to the armed forces, and which could carry out combat actions of the same nature in terms of goal, area and results as those performed by the armed forces.

If respondents present figures under this heading, it is requested that a short description of the functions of these forces be attached to the matrix.

(d) Military assistance (columns 9, 10 and 11)

Figure showing the ways along which military assistance can be granted



Explanations

Military assistance may be given from one country A to another B (flow a) and channelled through the State budget of the receiving country, either to allied forces stationed on this country's territory (flow b) or to the military sector of the receiving country (flow c).

Military assistance may also be given directly to allied forces stationed on another country's territory without passing through any other country's budget (flow d). (A country's support of its own military forces abroad shall not be reported as military assistance. Such expenditures shall instead be reported in columns 1 to 7.)

Military assistance may finally be given by a country to allied forces stationed on the country's own territory (flow e). Expenditures of country B for its own military forces from its own resources are designated as flow f.

Conclusions

Respondents such as country A are requested to report the sum of the flows a and d, i.e., all their military assistance granted to recipients abroad. This should be done in column 10. Respondents such as country B are requested to report the sum of the flows b and e, i.e., all their military assistance to allied forces stationed on their own territory. This should be done in column 9. The flows c and f, i.e., expenditure for the country's own military forces should accordingly be reported in columns 1 to 7.

There is a risk of double counting in so far as b and c are part of the same flow as a. The same money may thus be reported twice, both by country A and country B. In order to avoid such double counting, all respondents are requested below to report the total amount of military assistance received from abroad, i.e., the sum of the flow a. In cases where a country is both a donor and a recipient of military assistance, it is requested that both columns 9 and 10 be filled in.

Respondents are also requested to report any additional expenditures made in the reporting year by the country specifically for the purpose of supplying troops and equipment for United Nations peace-keeping activities. These expenditures should be shown in column 11 of the matrix, net of any compensation from external sources.

(e) Civil defence (column 14)

This requirement is intended to apply to expenditures for the protection, by other than customary military means, of civilian populations and facilities against danger of hostilities and disasters. Examples are expenditures on shelters and on plans and preparations for the evacuation and subsequent maintenance of civilians from areas under threat of attack. For an exhaustive definition of civil defence, respondents are referred to article 61 of the Additional Protocol of 1977 to the Geneva Convention of 1949. Reporting on civil defence is a question primarily for countries with strategic forces.

Resource costs (row headings)

(f) Personnel (row 1.1)

As the aim should be to exclude payments for past services, but to include payments for current and future services, the figures should include the direct payments made to personnel as well as other personnel compensation expenditures made by the employer, such as taxes, pension fees and other contributions. If such data are unavailable, expenditures on past services like pensions might serve as a surrogate, particularly if numbers of personnel remain level. In any event, an explanation of the nature of the data submitted should accompany the report.

(g) Conscripts (row 1.1.2)

The costs of conscripts should be valued in terms of actual payments. In order to approximate the opportunity costs of using conscripts in the military sector, respondents are requested to provide in part II below, information on appropriate average civilian wage rates as well as information on the quantity of civilian labour foregone by the use of conscripts.

(h) Materials for current use (row 1.2.1)

This item should include purchases of food, clothing, petroleum products, training materials (excluding ordnance and ammunition), medical materials, office supplies and the like.

(i) Maintenance and repair (row 1.2.2)

This item should include both contract services for repair and maintenance of equipment and facilities and purchases of parts, materials and tools for repair and maintenance of equipment and facilities.

In some cases, repairs may be intended not only to restore the quality and performance of equipment and facilities, but also to improve the quality or modify the performance. Such activities are to some extent to be regarded as investments. These major modifications and major repairs, containing substantial investment elements, should be reported under the cost categories 2.1 (Procurement) or 2.2 (Construction).

In any case, respondents are requested to describe the procedure chosen and to explain their current accounting practices or rules concerning the possible investment elements in major modification and repair activities. Such comments should be attached to the completed matrix.

(j) Purchased services (row 1.2.3)

This item should include expenditures for various kinds of purchased services, such as travel expenses, postal charges, printing expenses and other.

(k) Rent costs (row 1.2.4)

If capital costs for real estate belonging to the military sector do not result in actual payments, it is desirable that the rent costs to be reported be augmented by adding imputed capital costs. Such capital costs may be estimated by means of appropriate interest rates or rates of depreciation for the reporting year.

(l) Procurement (row 2.1)

A country's military potential depends not only on its procurement of military equipment but also on the rates of depreciation, depletion and retirement. Information of the latter type may not be readily available. It would, however, be highly desirable to obtain such information as is available concerning retirement and average-length-of-service rates for various kinds of equipment. Such information should be attached to the completed matrix. See also note (i) above.

(m) Armoured vehicles (row 2.1.5)

This item should include tanks, armoured personnel carriers and other armoured vehicles.

(n) Ammunition (row 2.1.8)

For the same reasons as mentioned under (l) above, it would be desirable to be able to compare the procurement figures for ammunition with corresponding consumption figures. In order to make this possible, respondents are requested in part II below to supply the latter type of information.

(o) Construction (row 2.2)

The construction of new facilities may often be connected with the acquisition of land. The expenditures of the military sector for the acquisition of land should be reported separately under 2.2.12 (Land).

(p) Electronics, etc. (row 2.2.4)

This item should also include communications and related structures and facilities.

(q) Training facilities (row 2.2.7)

This item should include expenditures for construction of fixed installations for training purposes, such as firing ranges, obstacle courses and others.

(r) Warehouses, depots, etc. (row 2.2.8)

This item should also include repair and maintenance facilities.

(s) Shelters (row 2.2.11)

Since it may not be possible to distinguish between fortifications and shelters for military personnel, respondents are requested to report all such costs under 2.2.10 (Fortifications), and to reserve item 2.2.11 (Shelters) for shelters that are constructed mainly for the purpose of protecting the civilian population.

(t) Land (row 2.2.12)

Information on sales of land by the military sector is requested in part II below.

(u) Research and development (row 3)

A distinction between the two subdivisions of this item could be made according to the degree to which research activities are object-oriented, i.e., connected with the creation of a concrete product such as a specific weapon system. Basic and applied but not object-oriented research may accordingly fall under the subdivision 3.1, while mainly object-oriented research would come under the subdivision 3.2 together with the development activities which are regarded as always object-destinated.

Where the respondents find difficulties in dealing with the subcategories, they are requested to make comments along these lines and to attach such comments to the completed matrix.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: .....
(wage per period of time, currency unit)

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: .....
(number of man-years)

2. With reference to point (d) of the specific guidelines above, respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: .....
(amount)

3. With reference to points (n) and (o) above, the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: .....

Sales from the military sector of:

(a) Land .....

(b) Real estate other than land .....

(c) Equipment .....

(d) Services .....

(e) Other .....

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	Answer	
	Available	Not available
Price index of specific relevance to the military sector	☐	☐
Exports of military equipment	☐	☐
Such exports divided by:		
(i) Countries	☐	☐
(ii) Regions	☐	☐
Imports of military equipment	☐	☐
Such imports divided by:		
(i) Countries	☐	☐
(ii) Regions	☐	☐

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.
